

ASRockind Technical Reference - Q&A

Question	According to the specification on ASRock industrial website, IMB-150 and IMB-151 support up to 8GB memory size. Could I install two 8GB memory modules on IMB-150 and IMB-151?
Release date	2020/4/16
Product	IMB-150, IMB-151
FAQ type	<input checked="" type="checkbox"/> Specification <input type="checkbox"/> OS & Driver <input type="checkbox"/> Application <input type="checkbox"/> BIOS/FW <input type="checkbox"/> Others

Answer:

IMB-150 and IMB-151 are powered by Intel Baytrial platform and system memory supports up to 8GB memory size in total.

If you would like to use 8GB RAM, please install only one 8GB memory module on the DDR3_A1 slot.
